

Qualcomm Buildings A, B & D

Project Location:

Qualcomm, 3195 Kifer Road, Santa Clara, CA

Owner: Qualcomm Buildings A, B & D

Contractor: SC Builders Inc.

Project Value: \$12,100,000

Scope of Services:

Design/Build HVAC, plumbing, building automation and sheet metal.

Project Description: ASI worked with Qualcomm and SC Builders to design and build for three 2-story buildings (A, B & D) on one campus, 238,000 S.F. of interior tenant improvements. This was a dynamic, fast paced, high profile project.

The project included data center with a dedicated chiller plant, labs, kitchen, cafeteria and office space.

ASI was awarded the project in February and by the end of July, Qualcomm employees occupied the campus.

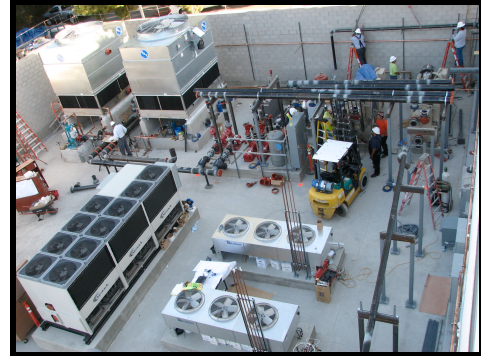

Project staffing, organization and communication were structured to insure success for the fast track delivery process. Air Systems utilized preconstruction coordination and off-site prefabrication to insure the just-in-time installations for the accelerated project schedule.

“When I hear the words Air Systems, I think Quality Company.”
